

Silva Award Motivation - Karen Chambers

Please see below Witsoc's motivation for our nomination of Karen chambers for the Silva Award:

1. Karen's involvement with the Gauteng Schools league has seen it grow tremendously year after year. The schools league attributes a majority of the orienteering participation within the country and has a significant role into the recruiting and developement of future high performance athletes. South African orienteering would suffer a great loss without the success of the schools league and under Karens Leadership it has seen exciting growth and developement. In the year 2016 the schools league achieved the following accomplishments:

- League has grown to 7 events
- 14 schools are now competing
- Over 400 students in total are registered
- A record Number of 308 competitors took part at the event at Heron Bridge

2. Above and beyond the schools league, Karen has worked to increase exposure by conducting developement activities at various schools in the Gauteng region.

3. Karen took it upon herself at the last minute to host the Nigh O world orienteering day event at Fourways High when other plans fell through. The event was an incredible success with a great turnout of frequent and new competitors.

4. Karen assisted the Polokwane Orienteering Club to enable them to send a group of developement memebers to attend the Big 5 event as well as Gauteng champs this year.

It is clear that Karen has a significant impact to the South African orienteering community and the development of orienteering within the country and Witsoc could not think of a more deserving nominee for the Silva Award.
